

Utkarsh Tripathi

San Jose, CA | +1(669) 343-4324 | Mail: utkarsh.tripathi@sjsu.edu | Portfolio: utkarsh9630.github.io/portfolio/

Summary

Data Engineer with **6+ years** building scalable data pipelines and cloud data platforms. Strong in production reliability (SLAs), **CI/CD automation**, and **cost/performance optimization** with BI enablement and LLM-driven automation for data operations.

Experience

Retired.com (WAO Management LLC)

Jun 2025 – Dec 2025

Data Engineer Intern & Co-Op | Project: Domo Dash Tech

Los Angeles, CA

- Replaced manual sprint planning by building an ADO to Snowflake pipelines comprising of (**50+ dbt models**) and stored procedures for computing key metrics (sprint goal points, capacity, and sprint-start snapshots) for **8 projects/12 teams** **eliminating 98%** manual excel load.
- Reduced runaway ingestion cost for ADO job consuming 1 row/credit (**10k+ rows**) by optimizing Snowflake load processing **500 rows/credit** and further added Azure Pipelines CI/CD with automated dbt runs + tests, cutting deployment time by 90%.
- Owned on-call for Snowflake/Rivery data pipelines and stabilized production by improving alerting/retry patterns and accelerating root-cause triage across API failures, schema drift, and warehouse issues; cut downtime by 40% and built a hackathon LLM prototype to parse logs and suggest recovery actions (auto-retry + root-cause hints).

Cognizant Technology Solutions Pvt. Ltd.

Apr 2021 – Aug 2024

Data Engineer (Associate) | Client: Sanofi Pharma Aventis

Noida, India

- Migrated an on-prem DW (slow queries) for EMEA healthcare to Snowflake & AWS S3 by rebuilding 50 ETL/ELT pipelines, redesigning data models, and implementing incremental loads; improved query response by 40% and accelerated delivery to analytics and BI teams.
- Reduced SLA misses and reprocessing from on-prem ETL failures by improving monitoring and redesigning IICS workflows while leveraging AWS S3 and migrating integrations to Snowflake; delivered a 75% efficiency improvement (runtime, deployment, speed, manual effort), reduced incidents, and mentored 3 interns on monitoring, documentation, and production support.

Cognizant Technology Solutions Pvt. Ltd.

Nov 2018 – Mar 2021

Business Intelligence Engineer (Programmer Analyst / Trainee) | Client: Sanofi Pharma Aventis

Pune, India

- Modernized a legacy on-prem DWH with manual updates by migrating to AWS S3 & Snowflake, redesigning schemas/models and rebuilding ETL in Informatica IICS; enabled cross-BU reporting for Sales & Marketing and Revenue Management while supporting QlikSense upgrades, improving availability by 90% and query performance by 85%.
- Automated orchestration and monitoring for 20+ applications by integrating Control-M with IICS tasks, adding health checks, email/ticketing alerts, and auto-trigger shell recovery scripts; reduced manual reruns and incident volume while sustaining 99.5% uptime.

Academic Projects

AI-Powered Autonomous Workforce Assistants | Data Engineering (Repo)

Aug 2025 – May 2026

- Built an Airflow-orchestrated pipeline ingesting enterprise comms (Slack, email, meeting transcripts) into AWS S3 & Snowflake and generating standardized JSON/JSONL artifacts for a multi-agent system (intent detection, summarization, Slack-Jira); owned the meeting summarizer agent producing structured minutes, action items, and ICS invites, achieving 97.82% JSON validity, 94.09% F1, ROUGE-1 = 0.85, and +9.87% quality improvement via prompt + schema validation refinements.

AI4Invest | Software Engineering (Repo)

Jan 2025 – May 2025

- Built and deployed a full-stack AI investment app by ingesting Yahoo Finance data, performing feature engineering in Python (Pandas), training a PyTorch LSTM, and serving personalized recommendations via Python APIs to a React frontend with JWT auth; persisted portfolios in MongoDB and deployed on AWS Elastic Beanstalk with 99.9% uptime for 200+ users (40% projected engagement gain).

Skills

Data Engineering & Cloud: Snowflake, dbt, Rivery, CI/CD, Azure Pipelines, AWS (S3, RDS, Elastic Beanstalk), Apache Spark, Hadoop, Kafka

Programming & Databases: Python, SQL, Shell Scripting, PostgreSQL, MySQL, Redshift, MongoDB, Oracle

ML & Analytics: Snowflake ML, Spark ML, XGBoost, Logistic Regression

Visualization & Tools: Power BI, Tableau, QlikSense, Domo, Git, Postman, React

Education

San Jose State University, USA — M.S. Applied Data Intelligence (GPA: 3.41/4.0)

Aug 2024 – May 2026

Bharati Vidyapeeth University, India — B.Tech Electronics (GPA: 3.57/4.0)

Jul 2014 – Jun 2018
