

Utkarsh Tripathi

San Jose, CA | (669) 343-4324 | Utkarsh.tripathi@sjsu.edu | [LinkedIn](#) | [Portfolio](#)

Summary

M.S. Applied Data Intelligence candidate with **6+ years** building production automation and data workflows and recent hands-on work building **LLM-powered agents**. Strong in **conversation logic and structured outputs** (schema-guided JSON, evaluation, iteration), **API integrations**, and **workflow reliability** (monitoring, troubleshooting, on-call). Experienced with **low-code ETL/workflow tools** (Rivery, Informatica IICS) and orchestrators (Airflow, Control-M) to reduce manual work and improve operational consistency.

Skills

Conversational AI / Agents: prompt engineering, structured generation (JSON schemas), evaluation (G-Eval, ROUGE/F1), iteration/guardrails

Automation & Integrations: REST APIs, webhooks, Airflow, Control-M, Azure Pipelines CI/CD, Rivery, Informatica IICS

Data & Platforms: Snowflake, dbt, AWS (S3, Elastic Beanstalk), Git

Programming: Python, SQL, Bash/Shell, JavaScript/TypeScript (basic)

Analytics/Viz: Domo, Power BI, Tableau, QlikSense

Backend/Web: Postman, JWT auth, React, MongoDB

Projects

Autonomous Workforce Assistants: Multi-Agent Workplace Copilot (Repo) Aug 2025 – Present

Airflow, AWS S3, Snowflake, FLAN-T5-Large (fine-tuned), G-Eval, structured JSON/JSONL

- Built an **Airflow**-orchestrated pipeline to ingest enterprise communications (Slack/email/meeting transcripts) into **S3** → **Snowflake**, producing standardized **JSON/JSONL** artifacts for downstream agent workflows.
- Owned the **meeting summarizer agent** to generate structured **minutes, action items, and ICS invites**; improved reliability via **prompt + schema validation iteration** (**97.82%** JSON validity, **94.09%** F1, **ROUGE-1=0.85, +9.87%** quality uplift).

AI4Invest: Full-Stack AI Investment App (Repo)

Jan 2025 – May 2025

React, Python (Pandas), PyTorch LSTM, MongoDB, AWS Elastic Beanstalk, JWT

- Built and deployed a full-stack AI app: ingested **Yahoo Finance** data, engineered features in **Python (Pandas)**, trained a **PyTorch LSTM**, and served recommendations via **Python REST APIs** to a **React** frontend with **JWT** auth.
- Persisted portfolios in **MongoDB** and deployed on **AWS Elastic Beanstalk** with **99.9%** uptime for **200+ users**.

Experience

Retired.com (WAO Management LLC)

Jun 2025 – Dec 2025

Automation Engineer Intern (Low-code Workflows & Integrations)

Los Angeles, CA

- Translated stakeholder reporting pain points into **automation-ready requirements** (KPI definitions, acceptance criteria) and delivered a governed sprint analytics workflow for **8 projects/12 teams**.
- Built a low-code ELT automation using **Rivery + dbt + Snowflake** for **ADO API** → **Snowflake** ingestion (**50+ dbt models**); implemented incremental MERGE/UPSERT loads and eliminated **98%** manual reporting.
- Monitored workflow runs and debugged failures (API timeouts, auth issues, schema drift); optimized ingestion efficiency from **1 row/credit** to **200 rows/credit** and added **Azure Pipelines CI/CD** with automated tests to cut deployment time by **90%**.

Cognizant Technology Solutions Pvt. Ltd.

Apr 2021 – Aug 2024

Workflow Automation & Data Integration Engineer (Associate) | Client: Sanofi Pharma Aventis

Noida, India

- Rebuilt **50** enterprise integration pipelines during on-prem → **Snowflake + AWS S3** migration; improved query response by **40%** and standardized delivery for analytics/BI consumers.
- Designed and stabilized **Informatica IICS** workflows with validations, conditional routing, and failure handling; reduced reprocessing and delivered **75%** efficiency improvement with stronger monitoring and runbooks.

Cognizant Technology Solutions Pvt. Ltd.

Nov 2018 – Mar 2021

Automation & BI Engineer (Programmer Analyst / Trainee) | Client: Sanofi Pharma Aventis

Pune, India

- Automated orchestration for **20+ applications** by integrating **Control-M** scheduling with pipeline jobs, trigger-based execution, alerting, and recovery scripts; sustained **99.5%** uptime while reducing manual reruns.
- Modernized legacy workflows onto **AWS S3 + Snowflake** and improved ETL reliability in **Informatica IICS**; increased availability by **90%** and query performance by **85%**.

Education

San Jose State University, USA — M.S. Applied Data Intelligence (GPA: 3.41/4.0)

Aug 2024 – Present

Bharati Vidyapeeth Deemed (to be) University, India — Bachelor of Electronics (GPA: 3.57/4.0) Jul 2014 – Jun 2018
